

Cara mempublish project android dari android studio kedalam github

1. Buat akun github melalui tautan
https://github.com/join?ref_cta=Sign+up&ref_loc=header+logged+out&ref_page=%2F&source=header-home
2. Lengkapi data berikut → kemudian klik create account

Join GitHub

Create your account

Username *

Email address *

Password *

Make sure it's at least 15 characters OR at least 8 characters including a number and a lowercase letter.
[Learn more.](#)

Email preferences

☒ Send me occasional product updates, announcements, and offers.

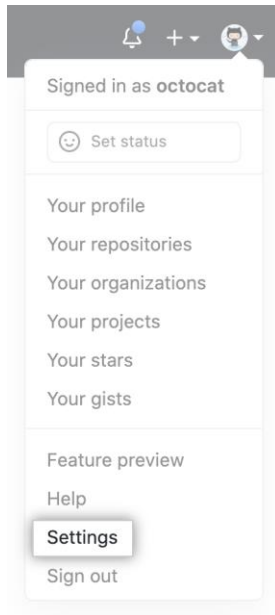

Verify your account

Pick the spiral galaxy

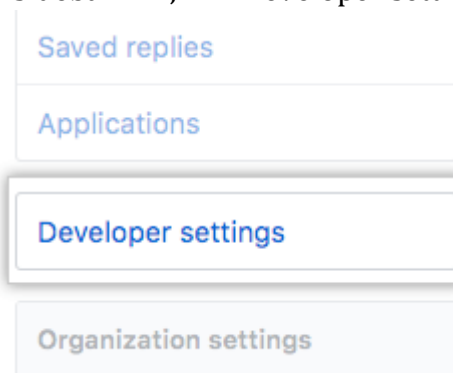

Create account

3. Setelah account sudah selesai dibuat, Buatlah token untuk mengakses akun github anda melalui android studio dengan cara, login kedalam account anda

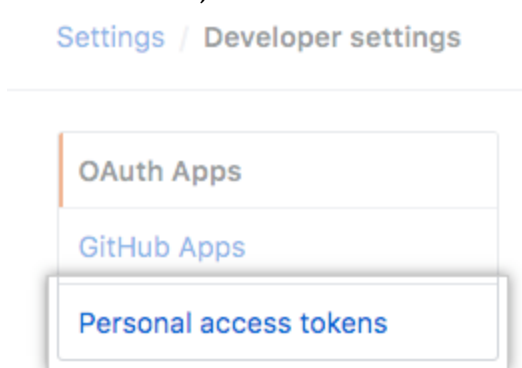

4. Di sudut kanan atas halaman anda, klik foto profil Anda, lalu klik Settings.

5. Di sidebar kiri, klik Developer settings.

6. Di sidebar kiri, klik Personal access tokens.

7. Klik Generate new token.

Personal access tokens

Generate new token

8. Berikan deskripsi untuk token anda.

Note

My bash script

What's this token for?

9. Pilih seluruh scopes → kemudian klik generate token

Select scopes

Scopes define the access for personal tokens. [Read more about OAuth scopes.](#)

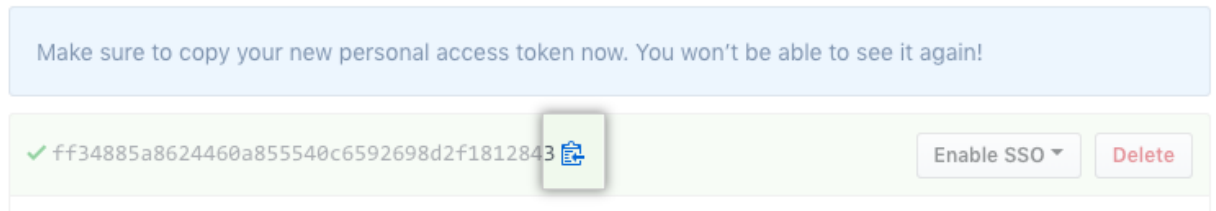

☐ repo	Full control of private repositories
☐ repo:status	Access commit status
☐ repo_deployment	Access deployment status
☐ public_repo	Access public repositories
☐ repo:invite	Access repository invitations
☐ security_events	Read and write security events
☐ workflow	Update GitHub Action workflows
☐ write:packages	Upload packages to GitHub Package Registry
☐ read:packages	Download packages from GitHub Package Registry
☐ delete:packages	Delete packages from GitHub Package Registry
☐ admin:org	Full control of orgs and teams, read and write org projects
☐ write:org	Read and write org and team membership, read and write org projects
☐ read:org	Read org and team membership, read org projects
☐ admin:public_key	Full control of user public keys
☐ write:public_key	Write user public keys
☐ read:public_key	Read user public keys
☐ admin:repo_hook	Full control of repository hooks
☐ write:repo_hook	Write repository hooks
☐ read:repo_hook	Read repository hooks
☐ admin:org_hook	Full control of organization hooks
☐ gist	Create gists
☐ notifications	Access notifications
☐ user	Update ALL user data
☐ read:user	Read ALL user profile data
☐ user:email	Access user email addresses (read-only)
☐ user:follow	Follow and unfollow users
☐ delete_repo	Delete repositories

☐ read:discussion	Read team discussions
☐ admin:enterprise	Full control of enterprises
☐ manage_billing:enterprise	Read and write enterprise billing data
☐ read:enterprise	Read enterprise profile data
☐ admin:gpg_key	Full control of public user GPG keys (Developer Preview)
☐ write:gpg_key	Write public user GPG keys
☐ read:gpg_key	Read public user GPG keys

Generate token

Cancel

10. Klik ikon clipboard untuk menyalin token ke clipboard Anda. Untuk alasan keamanan, setelah Anda keluar dari halaman, Anda tidak akan dapat melihat token lagi.

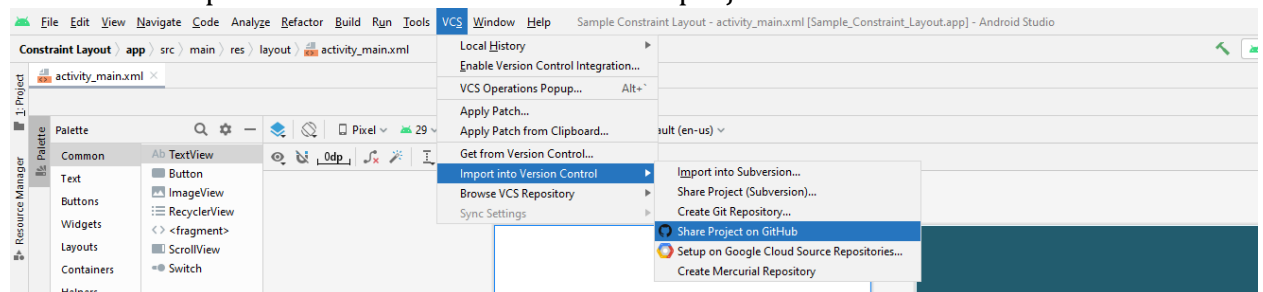

Tokens you have generated that can be used to access the [GitHub API](#).

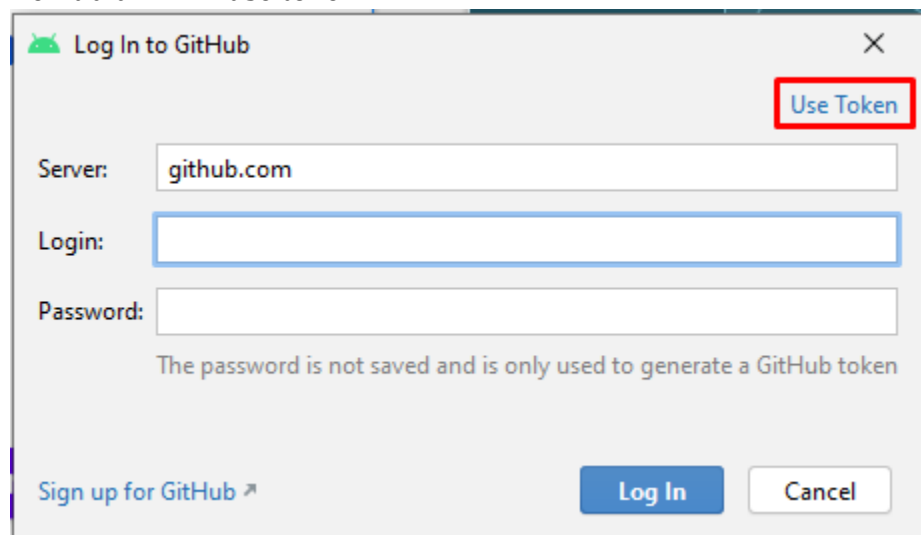

Note: Perlakukan token Anda seperti kata sandi dan rahasiakan. Saat bekerja dengan API, gunakan token sebagai variabel lingkungan alih-alih melakukan hardcode ke dalam program Anda.

11. Setelah token didapatkan, kemudian kembali kedalam android studio → buka projek yang ingin dipublish ke github.

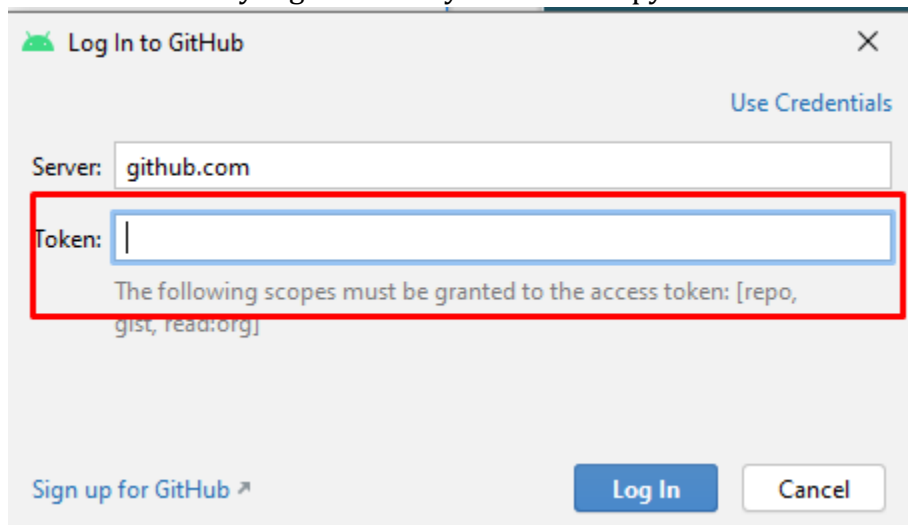

12. Klik VCS → import into Version Control → Share project on GitHub

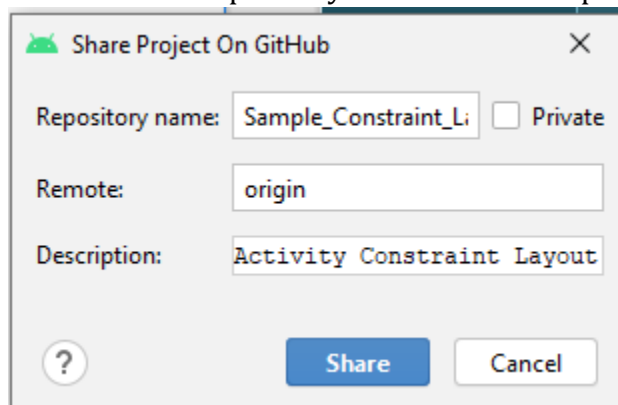

13. Kemudian klik “use token”

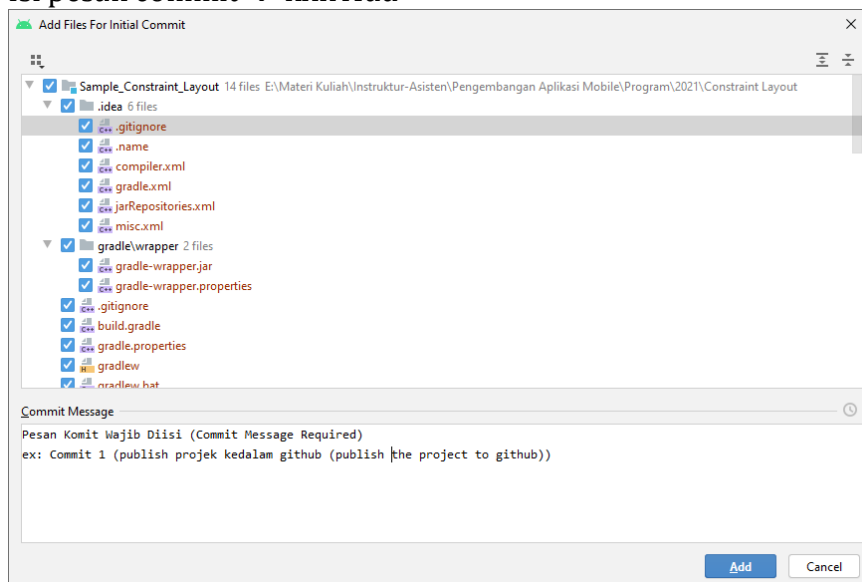

14. Masukkan token yang sebelumnya sudah dicopy → Kemudian klik Log In

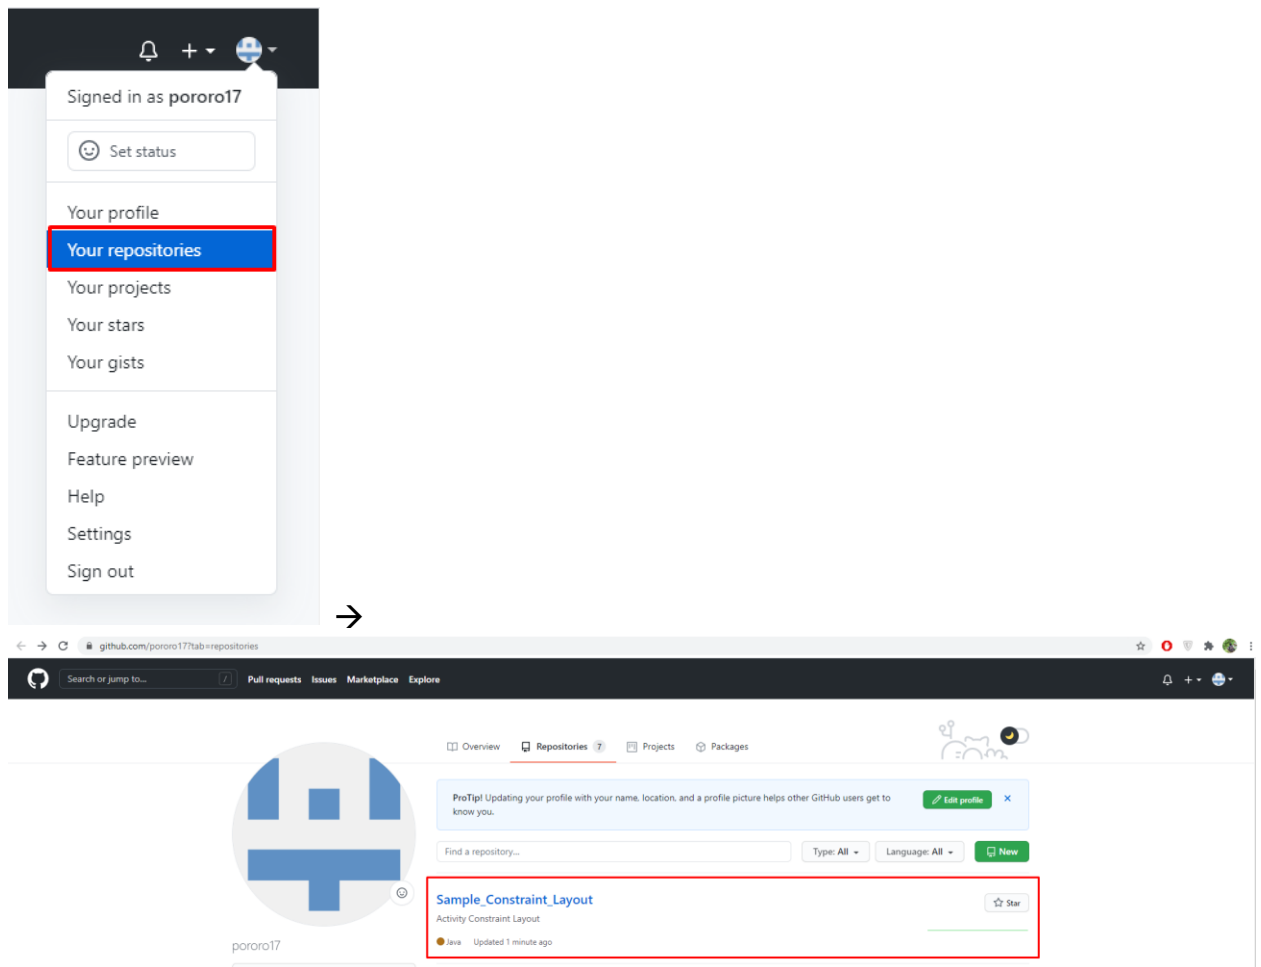

15. Kemudian isi Repository Name dan deskripsi → klik share

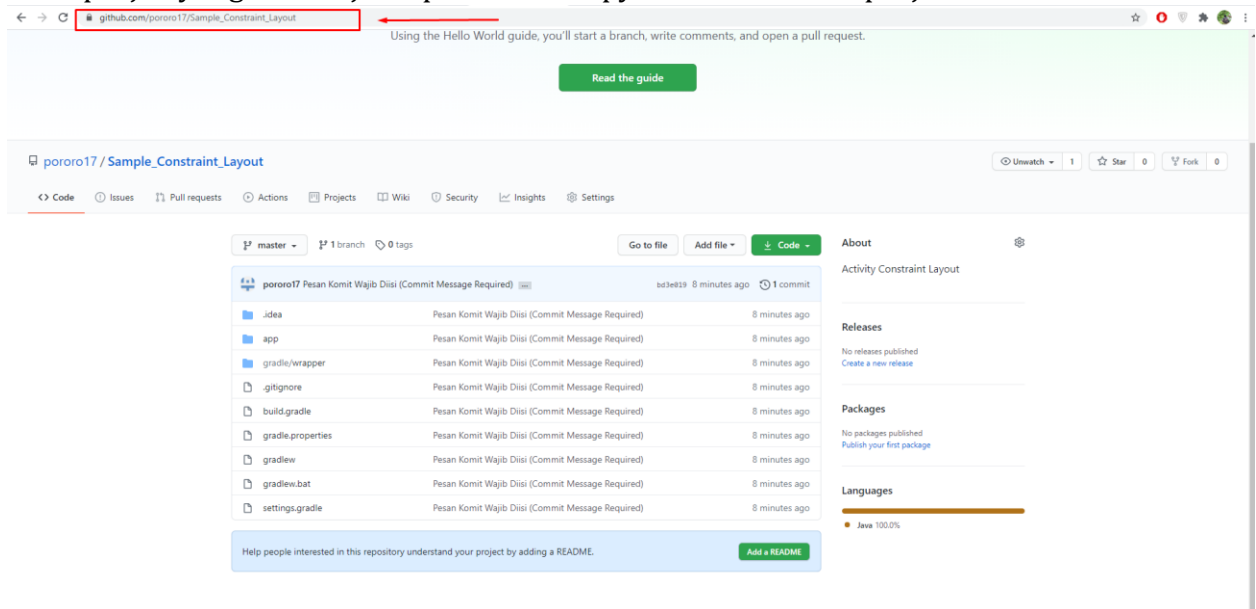

16. Isi pesan commit → klik Add

17. Kemudian buka akun github anda → In the upper-right corner of any page, click your profile photo, then click “Your Repositories”.

18. Buka proyek yang baru saja terpublish → copy alamat link dari proyek tersebut

19. Copy tersebut kemudian kumpulkan melalui myKlass
